Karina

I love solving Sudoku puzzles. They are fun and make me think a lot, which is good for my brain. I usually do it while I commute to work or when I'm at home. My children have also developed their interest in puzzles. We sometimes solve them together!

Diego

I think my favorite leisure time activity is drawing. I think I could be an illustrator because I do it all the time. I enjoy drawing portraits of people or just drawing what I see while I walk on the streets. I sometimes go to the park and look for a nice spot to sit down. I always carry colored pencils and a small notebook. You never know when you'll find something worth drawing!
